Metallurgy Lab: Machining Cast Parts	Name:
Safety: Wear safety glasses. Appropriate Machine Shop Attire	Date:
Materials: Aluminum pucks, ingots, alloyed pucks/ingots	
Procedure:	
Machine pucks and ingot—cutting, sawing, drilled, etc.	
Observation report:	
Describe what you remember from the foundry pouring which pro	oduced these pucks and ingots.
Consider the pour temperatures and conditions—the crucibles an observed or remember.	d the molds and quenching methods as well as anything else you

Machining Report:

Metal sample Foundry Process Guess	Type of Machining	Surface Condition	Interior Observation
